

EDUCATION

Cornell University • Ithaca, NY	May 2026
Master of Professional Studies in Information Science • 4.2 GPA	
<i>Coursework:</i> Managing innovation AI Chatbots, RAG, AI Agents Designing AI Products and Services Solving Challenges at the Enterprise with AI HCI Grad Studio	
Politecnico di Milano • Milan, Italy	Sep 2024
Master of Business Administration • Gianluca Spina Scholarship Recipient	
<i>Relevant Coursework:</i> Design Thinking Big Data and Artificial Intelligence Digital Transformation Strategy & Planning	
Universidad de Piura • Piura, Peru	Dec 2019
Bachelor of Science in Industrial and Systems Engineering	
<i>Relevant Coursework:</i> Design and Implementation of Internet-Based Services Management of Information Technologies	

RELATED EXPERIENCE

Product Management Intern • Jobrapido, Italy	May–Sep 2024
• Diagnosed low user retention as a UX problem and identified three levers: job-to-query matching, subscription flow, and UI redesign. • Improved keyword extraction accuracy to 80% through zero-shot prompt engineering with Mistral via Fireworks AI, directly increasing search relevance and engagement. • Wireframed redesign in Figma, built an A/B testing dashboard in Looker Studio, and delivered a prioritized execution roadmap. • Ran structured user testing sessions to validate design decisions across the search results page.	
Associate Product Manager • Rappi, Peru	Jan 2022–Sep 2023
• Led advertising products, including in-app placements and automated billing flows, reducing refunds by 45% and improving monetization across a multi-sided marketplace. • Owned full product lifecycle for CRM digitalization from design to adoption, achieving 92% usage rate and training 50+ cross-functional team members. • Made data-driven decisions using SQL and Power BI; ran A/B tests on user-facing products and developed PRDs aligned with strategic goals, reaching 75% average goal achievement. • Partnered with engineering, UX/UI, and business teams to ship scalable product solutions across diverse user workflows.	
Digital Product Analyst • Supermercados Peruanos, Peru	Sep 2020–Dec 2021
• Improved authentication and checkout flows using data-driven insights for a high-traffic e-commerce platform. • Defined user stories, prioritized initiatives, and aligned stakeholders across engineering, UX/UI, commercial, and marketing teams through SCRUM ceremonies. • Configured VTEX settings and implemented QA in production to ensure feature reliability.	

PROJECT WORK

"WHAT? Noise as Music" • Strudel, ART*TECH '26, Cornell	2026
• Composed a 2-minute audio piece using household sounds (microwave, appliances) as raw material, structured into rhythm and beat using Strudel, a live coding music environment. • Explored the boundary between noise and music through algorithmic composition, questioning what counts as a musical experience.	
Elecciones Perú 2026 • Claude Code, Vercel, Python	2026
• Designed and shipped a platform helping voters search, compare, and understand candidates for Peru's 2026 general elections, from concept to production. • Built an AI-powered candidate comparison using the Claude API, with a core focus on making complex political information accessible and clear for a non-technical audience. • Prioritized storytelling and context as the core product value: users needed to understand not just who candidates were, but what they stood for.	
CHRONOW • Figma, FigJam, FigBuild 2026 Hackathon	2026
• Served as PM on a 4-person Cornell team designing a memory and identity product grounded in chronoception research and a 40-person user survey.	

- Owned product narrative, prototype development in Figma Make, and ensured alignment between user research and product vision.

Branding Generator • GPT-4, Python, Streamlit, RAG, AI Agents

2025

- Built a web-based AI assistant that generates full branding guidelines by orchestrating agent handoffs across color palettes, typography, tone, and moodboards.
- Structured multi-agent workflows to ensure consistent, structured outputs across generation steps.

ADDITIONAL EXPERIENCE

Graduate Teaching and Research Specialist • Cornell University

Aug 2025 - Present

- Facilitated user-centered design processes with student teams: user research, wireframing, usability testing, and iterative prototyping.
- Guided teams from insight to high-fidelity design, ensuring specifications stayed grounded in real user needs.

Ad Honorem Researcher •Universidad de Piura

Jan 2025 - Jul 2025

- Defined requirements and scoped an ML-based solution for early physical frailty diagnosis using depth camera data, bridging technical development with real user needs.
- Synthesized literature and research findings to inform product direction for a government-funded research initiative (Concytec-Prociencia).
- Collaborated cross-functionally with undergraduate researchers, co-supervising thesis work and contributing to publication.

IT & Strategy Consulting • Brachitek, Italy

Apr 2024–Jan 2025

- Co-wrote investor pitch deck and proposed strategic initiatives to support B2B hardware and software growth.
- Built and launched the institutional website using HTML and CSS.

SKILLS

- Product Management:** Roadmap planning, user research, A/B testing, PRDs, stakeholder management, Jira, Amplitude, Agile project management.
- Data and Analytics:** SQL, Power BI, Tableau, BigQuery, Looker Studio
- Design and Prototyping:** Figma, wireframing, usability testing, heuristic evaluation, Material 3, WCAG
- AI and Building:** Claude Code, Figma Make, n8n, Python, prompt engineering, RAG, LLM agents, Streamlit
- Web:** HTML, CSS, JavaScript, responsive design
- Languages:** Spanish (native), English (fluent), Italian (fluent)
